BLAC needs more land, to provide much needed affordable housing.

We truly believe that the most successful relationships come from collaboration. Let us demonstrate to you what advantages BLAC brings as your development partner.

As a general guide, we need the following:

- Brownfield land or neglected buildings for between 5 and 50 units - houses or flats.
- These sites should be within the South East of England.
- Housing-led regeneration partnerships.
- Problematic sites, contaminated or planning difficulties always welcomed for discussion.

BLAC is happy to consider larger sites.
